Responsive vCard Template

Thank you for purchasing my template. You're awesome!

In the following chapters I will try to explain in detail every aspect of the template.

1. Installing the template

After you have downloaded the template from Themeforest, **extract it** to your desired location and then **copy** all folders and files to your desired web server's directory.

2. Do I need to edit anything?

Yes, you need edit the file located at **ajax/ajax.php**.

This file handles the contact form process and therefore you need to edit the sender email to your email.

To do so **locate line 6**

```
$from = 'your@email.com';
```

And change **your@email.com** to **your own** email address.

3. Editing the Header

The Header is split into 3 parts

Left Side	Middle	Right Side
-----------	--------	------------

Left Side contains the **profile picture**.

Middle contains the **username**, **small info**, the **vCard download link** and the **Portfolio special link**.

Lastly, the Right Side contains the **social buttons**.

To edit the Header, simply open up index.html and locate it between the comments

```
<!-- Header -->  
...  
<!-- /Header -->
```

4. Editing the slider

The slider contains by default 3 slides. It can contain up to 10 slides with easy modification. To edit the slider, first locate it between the following comments in index.html file

```
<!-- Slider -->  
...  
<!-- /Slider -->
```

To add or remove a slider item, simply insert or delete a **li** block respectively.

Example:

This is our current slider.

```

129 <!-- Slider -->
130 <div id="sequence">
131   <ul class="sequence-canvas">
132     <li>
133       <div class="info1">
134         <p class="top">Title of 1rst work</p>
135         <p class="bot">Info on 1rst work</p>
136       </div>
137       
138     </li>
139     <li>
140       <div class="info2">
141         <p class="top">Title of 2nd work</p>
142         <p class="bot">Info on 2nd work</p>
143       </div>
144       
145     </li>
146     <li>
147       <div class="info3">
148         <p class="top">Title of 3rd work</p>
149         <p class="bot">Info on 3rd work</p>
150       </div>
151       
152     </li>
153   </ul>
154   <ul class="controls">
155     <li class="sequence-prev icon-angle-left"></li>
156     <li class="sequence-next icon-angle-right"></li>
157   </ul>
158 </div>
159 <!-- Slider -->

```

Now adding a 4th item should look like this:

```

129 <!-- Slider -->
130 <div id="sequence">
131   <ul class="sequence-canvas">
132     <li>
133       <div class="info1">
134         <p class="top">Title of 1rst work</p>
135         <p class="bot">Info on 1rst work</p>
136       </div>
137       
138     </li>
139     <li>
140       <div class="info2">
141         <p class="top">Title of 2nd work</p>
142         <p class="bot">Info on 2nd work</p>
143       </div>
144       
145     </li>
146     <li>
147       <div class="info3">
148         <p class="top">Title of 3rd work</p>
149         <p class="bot">Info on 3rd work</p>
150       </div>
151       
152     </li>
153     <li>
154       <div class="info4">
155         <p class="top">Title of 4th work</p>
156         <p class="bot">Info on 4th work</p>
157       </div>
158       
159     </li>
160   </ul>
161   <ul class="controls">
162     <li class="sequence-prev icon-angle-left"></li>
163     <li class="sequence-next icon-angle-right"></li>
164   </ul>
165 </div>
166 <!-- Slider -->

```

So basically we have added a new li block with the info div changed to the number of item.

5. Editing the About Page

Locate the About page code between the following brackets

```
<!-- About page -->  
...  
<!-- /About page -->
```

About page is split into 4 rows.

About
Personal Details
Services
Tweets

All easy to edit.

6. Editing the Resume Page

Locate the Resume page code between the following brackets

```
<!-- Resume page -->
...
<!-- /Resume page -->
```

Resume page is split into 2 parts.

Left Side	Right Side
Clients	

Left side contains the **Employment**, **Education** and **Awards** data.

Right side contains the **Skills**, **Tools** and a link to download your **resume**.

Clients contains your **clients logo with some info** to be displayed upon logo click.

7. Editing the Portfolio Page

Locate the Portfolio page code between the following brackets

```
<!-- Portfolio page -->  
...  
<!-- /Portfolio page -->
```

To add or remove items from the portfolio simply **add or remove items** from the **UL block portfolio_grid**.

After you **add an item**, also **add its category** on the **li's class item**

You can also edit the **portfolio filter** menu above the **portfolio grid**.

8. Editing the Blog Page

Locate the Blog page code between the following brackets

```
<!-- Blog page -->
...
<!-- /Blog page -->
```

Blog Page is split into 2 parts.

Posts	Right Side
--------------	-------------------

Posts contains **all blog posts**.

Right side contains the **search bar, categories, tabs(popular, recent and comments), archives and text widget**.

To add a post, **add one post block** on the **posts class div**.(Simply copy/paste one existing blog post).

Then edit the data-post="(Number)" to the total number of posts including the one you are adding(if there were 3 the data-post would now be 4).

Then edit the hidden container which contains the full post when a user decides to view the post.

To delete a post, **delete it from the posts div** and also from the **blog_posts div**.

8. Editing the Contact Page

Locate the Contact page code between the following brackets

```
<!-- Contact page -->  
...  
<!-- /Contact page -->
```

On the Contact Page, you can edit the form and the contact information.

To edit the contact information , simply **locate** the **contact_info div** and **edit it**.

9. Editing the Themes & Patterns

There are 6 pre-defined Themes from where you can choose from.

- Blue
- Red
- Green
- Yellow
- Purple
- Cyan

To change color simply change the body class from **blue_color** to **red_color**, **green_color** etc

There are 12 pre-defined patterns located in `img/patterns` and the default background located in `img` folder.

To change a pattern change the html style background tag from **img/bg.jpg** to **img/patterns/p1.jpg** or **img/patterns/p2.jpg** etc

10. Sources & Credits

- [Font Awesome](#)
- Fonts : Open Sans & Oswald
- Images by [lorempixel.com](#)
- Picture Image by flickr.com
- Portfolio Images from Themeforest asset library

Some images are not included in the downloaded files.

Again, thank you for downloading my template!

For any help or questions, please contact via the comments section of the item or via the contact form found in my profile [here](#)

Lastly, if you liked this template, please don't forget to rate it.

Thank you!
